github.com/oikaiser · oikaiser.github.io

SAFe-certified Scrum Master and Project Manager with experience coordinating technology initiatives, facilitating agile ceremonies, tracking delivery progress, and reporting status to stakeholders. Combines a software engineering background with practical experience structuring workflows in Jira, maintaining project documentation, and supporting cross-functional teams in remote and client-facing environments.

EXPERIENCE

IT Project Manager
MAY 2026 – PRESENT

NTT DATA · Remote · Contract · Client: Banamex

Fraud-prevention and risk-technology program for a major financial institution: release governance and cross-functional delivery across multiple concurrent initiatives in a regulated environment.

- → Lead PM for a data-pipeline release deployed in feature-off mode: timelines, security, architecture and performance sign-offs, and release documentation.
- → Re-baselined the schedule after identifying a test-environment dependency, formalizing a documented impediment and risk entry (mitigation, owners, closure criteria).
- → Authored governance artifacts (approvals, risk registers, minutes, status reports) and consolidated the status of three initiatives for the director-level technology owner.

LLM Trainer
JAN 2026 – MAY 2026

Revelo · Remote · Freelance

AI training and evaluation on full-stack app generation and single-page front-end development. Reworked AI-generated applications into responsive, production-ready results and validated build, runtime, and features, including Docker-based verification.

LLM Trainer
SEP 2025 – JAN 2026

Turing · Remote · Freelance · Client: Apple

Multilingual AI training: designed multi-turn workflows and evaluation frameworks with attention to accuracy, quality, and consistency.

Associate Project Manager / Scrum Master
JUN 2024 – SEP 2025

Instituto Federal de Telecomunicaciones (IFT) · Mexico City (Remote)

Structured delivery of a public-sector technology initiative using predictive and agile practices.

- → Defined the agile operating structure: ceremonies, workflows, and delivery practices aligned with the client.
- → Configured Jira workflows for sprints, incidents, and dependencies; prepared recurring reports for leadership and client stakeholders.

Software Engineer (Full-Stack)
MAY 2022 – APR 2024

Luxoft · Guadalajara (Remote) · Client: Expedia Group

Built UI components for the flights page with React and TypeScript, tested with Jest and Cypress, in a SAFe Agile environment.

Web Developer
JUL 2018 – MAY 2022

Nerdy Trust · Mexico City · Clients: BAMF, enDrive, Turbodega, Ubuken, TED, NAFIN

Designed and delivered landing pages and websites for multiple clients with React, Vue.js, and Django, managing changes and iterative improvements.

Intern Developer
FEB – AUG 2017

CODES, Consultoría y Desarrollo de Sistemas · Mexico City

Supported front-end and back-end development for the YAAX app.
